PRIORITY RATING SYSTEM LAND AND WATER CONSERVATION FUND FY 2005 FUNDING CYCLE

PRIORITY RATING SYSTEM DOCUMENT

401 Adams Avenue
Montgomery, Alabama 36103

June 2004

CIVIL RIGHTS ACT OF 1964

Title VI (42 U.S.C. 2000 (d));

**"NO PERSON IN THE UNITED STATES SHALL ON THE
GROUNDS OF RACE, COLOR OR NATIONAL ORIGIN, BE
EXCLUDED FROM PARTICIPATION IN, BE DENIED THE
BENEFITS OF, OR BE SUBJECTED TO DISCRIMINATION
UNDER ANY PROGRAM OR ACTIVITY RECEIVING
FEDERAL FINANCIAL ASSISTANCE."**

Title VI is directed at recipients of Federal financial assistance, and concerns itself with nondiscrimination to the ultimate beneficiaries of that assistance. Regulations of the U.S. Department of the Interior strictly prohibit unlawful discrimination in departmental federally assisted programs on the basis of race, color, national origin, age or handicap. Any person who believes he or she has been discriminated against in any program, activity, or facility operated by a recipient of Federal assistance should write to:

**Director
Office of Equal Opportunity
U.S. Department of the Interior
Washington, D.C. 20204**

GENERAL GUIDELINES

The following guidelines are provided to assist in developing a project design and preparing the LWCF application.

1. **CITIZEN PARTICIPATION (CP):** While CP is a minimum requirement for participation in the Land and Water Conservation Fund Program (LWCF), its function as a planning aid cannot be overstressed. All too frequently communities build facilities that community residents either do not want or need. The key to a successful CP process is first of all, getting the public involved and secondly, letting them know what alternatives are available. CP will be an effective tool in designing park facilities if it is not used merely as a process to be followed in order to secure a grant.
2. **ENERGY CONSERVATION:** Project design should include consideration for the following:
 - a. **Project Location:** Locate facilities in populated areas so that they are accessible by foot, bicycle, or public transportation.
 - b. **Facility Construction:** Enclosed support facilities that utilize mechanical heating or cooling systems must be designed and constructed to meet the thermal insulation standards of the American Society of Heating, Refrigerating and Air Conditioning Engineers or other equivalent standards. Facilities must be designed so that they minimize the use of mechanical, electrical, and lighting equipment. Proper consideration of site characteristics should allow the utilization of breezes and the sun to reduce the need for artificial cooling or heating (passive solar heating and cooling).
 - c. **Grounds Maintenance:** Projects should incorporate the use of low maintenance ground cover whenever feasible and park roadways should not exceed the size needed to serve the proposed recreational facility. Road surfaces should be developed with locally obtained materials rather than oil-based materials such as asphalt. NOTE-park roads may not be used to access private or commercial facilities. They must be dedicated as park roads.
3. **SITE SELECTION:** When selecting a park site try to locate a site that has more acreage than is required for the development proposed in your application. Also, select a site that is compatible with your proposed development. For example, don't try to build ball fields on a heavily forested site or a site that requires extensive site preparation. Similarly, do not build passive facilities in an area primarily dedicated to competitive activities.
4. **MAXIMUM CARRYING CAPACITY:** The proposed recreational facilities should be designed to serve no more than 130% of the activity demand in your project service area. Building above the 130% level serves no purpose other than to cost additional money as the excess capacity will be either unused or under-used.
5. **ACTIVITIES ELIGIBLE/INELIGIBLE FOR FUND ASSISTANCE:** The purpose of the Land and Water Conservation Fund program is to provide outdoor recreational opportunities for the general public through land acquisition, development or a combination of acquisition and development. Types of acquisition and/or development projects that may or may not be eligible for fund assistance include, but are not limited to, the following:

ACQUISITION**Eligible**

Water-based public recreation projects such as frontage on the ocean, rivers, streams and lakes	Yes
Land for creating water impoundments	Yes
Natural areas and preserves	Yes
Urban land for day use (picnic areas, playgrounds, etc.)	Yes
Historic sites, structures and museums	No
Areas used primarily for semi-professional and professional arts and athletics	No
Areas used for construction of indoor facilities	No
Partial holdings in an existing recreational facility	No

DEVELOPMENT**Eligible**

Renovation of existing outdoor recreation facilities	Yes
Sports and playfields	Yes
Picnicking, swimming	Yes
Boating, fishing, hunting, camping areas & trails	Yes
Aggregate surfacing of parking areas & access roads	Yes
Stadiums, tracks, & fields for interscholastic sports	No
Professional facilities	No
Indoor facilities, mobile recreation units	No
Support facilities not associated with development of an eligible activity	No
Asphalt paving of access roads and parking areas	No
Development of prime or unique farm land (Prime farm land is defined as land which is presently under cultivation, or has been under cultivation within the last five years)	No

LAND AND WATER CONSERVATION FUND PROJECT

APPLICATION

LWCF ACT REGULATIONS

Prior to beginning the application for LWCF assistance, please review the following program regulations and requirements.

1. All lands acquired with LWCF assistance must be operated and maintained in perpetuity for public outdoor recreational use. Such lands cannot be converted to any other use without the written approval of the Secretary of the U.S. Department of the Interior and the Director of ADECA. Before project completion, the following "Limitation of Use" must be **incorporated into the deed** for land acquisition projects, land acquisition and development (combination) projects, and development projects:

NOTICE OF LIMITATION OF USE

This property has been acquired or developed with Federal financial assistance provided by the National Park Service of the U. S. Department of the Interior in accordance with the Land and Water Conservation Fund Act of 1965, as amended, 16 U.S.C. 4601-5 et sec. (1970 ed.). Pursuant to a requirement of that law, this property may not be converted to other than public outdoor recreation uses (whether by transfer, sale or in any other manner) without the express written approval of the Secretary of the Interior. By law, the Secretary shall approve such conversion only if he finds it to be in accord with the then existing comprehensive statewide outdoor recreation plan and only upon such conditions as he deems necessary to assure the substitution of other recreation properties of at least equal fair market value and or reasonably equivalent usefulness and location.

2. Once a park boundary has been identified and agreed upon by ADECA and the project sponsor, all facilities constructed within the park boundary must comply with the rules and regulations of the LWCF Act and the L&WCF Grants-in-Aid Manual. This also applies to improvements developed totally with local funds. In addition, the park site cannot be converted to any other use without the written approval of the Secretary of the Interior and the Director of ADECA. This regulation applies to park sites developed in whole or in part with LWCF assistance.
3. All utility lines located within the park boundary must be placed underground. This includes any future development within the park boundary.
4. A sign acknowledging that Federal LWCF monies were used to acquire and/or develop public outdoor recreation facilities must be in evidence at all fund-assisted park sites.
5. All public recreation facilities constructed within the LWCF assisted park must be accessible to the handicapped.
6. Once a LWCF grant has been awarded to a project sponsor, all recreation facilities of the project sponsor must be operated in compliance with Title VI of the Civil Rights Act of 1964.
7. Once funds have been committed to a LWCF development project, the project sponsor has 120 days to begin construction. Failure to comply with this regulation may result in the project being terminated.
8. All LWCF assisted project sites must be programmed, operated and maintained in a manner that encourages public participation.

APPLICATION CHECKLIST

Please use this checklist to determine that all required parts of the application are included prior to submission to ADECA.

• Transmittal letter signed by the Mayor/Chairman/State Agency Director	<input type="checkbox"/>
• Resolution from appropriate governing body authorizing submission of the application	<input type="checkbox"/>
• A signed application cover sheet	<input type="checkbox"/>
• Project budget	<input type="checkbox"/>
• Environmental assessment document	<input type="checkbox"/>
Concurrence from the Army Corps of Engineers	<input type="checkbox"/>
Concurrence from the U.S. Fish and Wildlife Service	<input type="checkbox"/>
Concurrence from the Alabama Historical Commission	<input type="checkbox"/>
• Application Rating Sheet	<input type="checkbox"/>
• Incentive criteria justification and support documentation	<input type="checkbox"/>
• Program Criteria Calculations	<input type="checkbox"/>
• Project Narrative	<input type="checkbox"/>
Recreation Facility Inventory	<input type="checkbox"/>
• Citizen Participation Documentation	<input type="checkbox"/>
• Copy of the deed to the property to be improved with grant assistance.	<input type="checkbox"/>
• Maps	<input type="checkbox"/>
Property boundary area map	<input type="checkbox"/>
Preliminary site plan	<input type="checkbox"/>
Location Map	<input type="checkbox"/>
USGS Quad Map	<input type="checkbox"/>
• Signed statement from private landowner expressing support (If Applicable)	<input type="checkbox"/>
• Letters of endorsement (Optional)	<input type="checkbox"/>
• Concurrence letter from the appropriate Regional Planning Commission (If Applicable)	<input type="checkbox"/>
• Water obstruction & encroachment permit (If Applicable)	<input type="checkbox"/>
• 1 ORIGINAL AND 2 COPIES OF THE APPLICATION TO ADECA	<input type="checkbox"/>

Please include a copy of this checklist with your application.

FY 2005 LWCF APPLICATION COVER SHEET

1) SPONSOR		2) PROJECT LOCATION CODES	
a. Name		a. Congressional District #	
b. Organization		b. State House District #	
c. Street/P.O. Box:		c. State Senate District #	
d. City		d. Zip Code	
e. County		e. Phone Number	
f. E-Mail Address		f. Fax Number	
g. Contact Person		g. Tax ID Number (FIN)	
3) PROJECT SITE CONTROL:			
a. Acres to be Purchased		f. Acres owned by Sponsor	
b. Acres to be Donated		g. Date Acquired (MM/YY)	
c. Acres to be Leased		h. Acres Leased by Sponsor	
d. Total Acres (Sum a,b,c)		i. Years Remaining on Lease	
e. Total Site Acres (Sum d,f,h)		j. Leased From?	
4) PROJECT TITLE (35 Characters Maximum)			
5) PROJECT DESCRIPTION: (135 Characters Maximum)			
6) PROPOSED FUNDING:			
SOURCE	TOTAL	CASH	INKIND AND DONATED LABOR OR EQUIPMENT
a. LWCF			
b. Sponsor			
c. Other			
TOTAL			
7) SOURCE OF PROJECT SPONSOR MATCHING SHARE:			
a. Park Revenue	%	d. Donated Labor & Equipment	%
b. Bonds	%	e. General Fund	%
c. Cash Donations	%	f. Other Federal Programs	%
8) CERTIFICATION: The applicant certifies that the data contained in the attached application is true and correct; the application has been duly authorized; and, the applicant understands that incorrect or incomplete information may cause the application to be rejected.			
a. Typed Name and Title		b. Signature	c. Date

LAND AND WATER CONSERVATION FUND

PROGRAM CRITERIA

1. Federal Share Per-Capita.

RANGE	POINTS
\$0.00 to 4.00	20
4.01 to 6.00	16
6.01 to 8.00	12
8.01 to 10.00	8
10.01 to 12.00	4
Over \$12.00	0

2. OPERATION AND MAINTENANCE OF EXISTING LWCF ASSISTED PARKS (-20 to +20)

Forty points are available from this criteria based on site inspection by ADECA staff. All negative points will be documented by photographs and comments.

3. POPULATION GROWTH

Using Attachment F, locate your jurisdiction and calculate the following:

2000 Population	1990 Population	Difference	Percent Change

Points will be awarded based on the value contained in the Percent Change column as follows:

Percent Change	Points
20%-0%	1 Point for each Percentage Point of Change to a Maximum of 20 Points

4. PROJECT FEASIBILITY

Analysis of project feasibility relates all components of the application: scope, landuse, park system assessment, service area, budget, environment, method of approach, etc. The determination of feasibility is based on the professional knowledge of the LWCF staff and the results of the on-site inspection. A maximum of 50 points may be awarded for this criterion.

INCENTIVE CRITERIA

These are criteria which may give an applicant additional points for pursuing priorities identified by the Alabama Citizens Advisory Council for Recreation Resource Planning or contained in the State Comprehensive Outdoor Recreation Plan. **All points that are not sufficiently documented, based on LWCF staff review, will be disallowed.**

ITEM	CRITERIA	POINTS
1.	The project includes a gift of land to be dedicated for recreational use. The donation must be large enough to accommodate the activities contained in the application and occur after project approval.	10
2.	The project addresses a regional SCORP priority identified in Appendix E.	20
3.	The acquisition is necessary to protect outstanding natural resources that are in danger of imminent loss.	25
4.	The proposed project has as one of its primary goals, the development of passive, non-tournament or family oriented recreation facilities. Passive recreation is characterized by minimal development e.g., nature/hiking trails, picnic areas, etc. Non-tournament field and court sport facilities (ballfield and tennis/basketball courts) may also be awarded these points, as may projects that include family oriented facilities such as swimming pools, etc. Over 50% of project must support passive, non-tournament or family oriented activities in order to claim points for this criterion.	25
5.	The application is a joint effort of two or more governmental entities, e.g., two cities or a county and a city combining resources to build and committing to maintain a facility that will serve both jurisdictions.	10
6.	The applicant has never received a Land and Water Conservation Fund grant	10
7.	The application is in support of or complements a previous Land and Water Conservation Fund assisted project at the same site.	10
8.	Applicant has a full time recreation department or board. Jurisdictions that do not own recreation facilities will receive full points for this criterion if they demonstrate that a recreation board will be established in the event that they are funded. A recreation committee of a city council does not qualify as a park board. The park board must be active: that is, it must meet at least quarterly and be supported by an ordinance or resolution of the governing body.	10
9.	Acquisition of urban open space including land for greenbelts or other linear or connecting parklands such as abandoned railroad right-of-way.	25
10.	Acquisition and/or development of nonmotorized water access areas for canoeing and rafting.	25
11.	Acquisition and/or development of saltwater beach access areas.	25
12.	Renovations of existing facilities that have deteriorated because of age or overuse. Facilities that have not been adequately maintained are ineligible for assistance.	25
13.	Applicant employs a professional recreation director. Applicants with fewer than 5,000 people within their service area or jurisdictional limits, whichever is larger, may be awarded full points for this criterion. Professionalism is defined in terms of education, training and experience. To be awarded points for this criterion an applicant must document the qualifications of its park and recreation director or include a resource management plan.	20
14.	An application for recreation facilities in urban areas will provide recreational opportunities for the disabled beyond provision of minimum access to restrooms, parking, etc. Examples of park facilities that could be constructed or easily made accessible include playgrounds, exercise trails, or interpretive areas. Points may be claimed by jurisdictions having therapeutic recreation programs staffed by qualified recreation professionals provided that the facilities requested or property acquired would be used in the therapeutic program. Applicants with fewer than 5,000 people in their jurisdictional limits may be awarded full points for this criterion.	20
15.	Development of recreational facilities that compliment historical, archaeological or cultural resources; contribute to site interpretation; or have a positive effect on tourism.	25

PROJECT NARRATIVE

- I.1 Project Scope and Description: Describe in detail the activities covered within the scope of this application. If the site is an existing park, describe park's improvements and relate the proposed development to the park system. Also include discussion of previous LWCF activity at the site. This is also the section where you present the narrative for the Program Criteria—Federal Cost Per Capita—address Population Growth in II below.
- I.2 Need for Assistance: Discuss why assistance for this project is needed? Include references to relevant studies or reports, which have a direct or indirect impact on the proposed project (i.e., capital improvement plans, open space studies, recreation and park master plans). If a renovation project, discuss in detail the factors that made renovation necessary.
- II. Project Service Area: The Project Service Area (PSA) is the geographic area, which is to be directly served or benefited by the proposed project. In most cases, the PSA will reflect jurisdictional boundaries (city limits or county boundaries). However, in some instances, a project may be designed to serve only a portion of a jurisdiction as in the case of a district park or an urban playground. In other cases a municipality may recognize the need to develop recreational facilities to serve an area outside of its corporate limits. Regardless, it is extremely important that the applicant documents and justifies the geographic size of the PSA and its population. Use of the 2000 population estimates provided by the Census Bureau is required for this item unless the applicant can justify other sources (local census, school district boundaries, etc.).

The attached Recreation Facility Inventory Form must be completed for each recreational facility within the service area.

- IV. Land Donation: The LWCF program encourages the donation of land to be dedicated for recreational use. If your project involves a donation of land to occur **after** grant approval, discuss the circumstances surrounding the donation and how the donated land will expand recreation opportunity. Be sure to mention the source of the donation. The donation must be large enough to constitute a viable recreation area.
- V. Protection of Unique Natural Resources: The protection of unique natural and/or scenic resources is a LWCF priority issue during this funding cycle. Applicants proposing to acquire a unique natural area should describe in detail the unique characteristics of the project site. References to authoritative publications which substantiate the unique qualities of an area or official designations, e.g., National Natural Landmark or wild and scenic river designation, should be included as appropriate. Also discuss why action is needed at this time.
- VI. Recreation Delivery System: Discuss the organization and programmatic aspects of the recreation delivery system. What type of organization is responsible for providing recreation in your jurisdiction, i.e., a recreation board, recreation department, city council or county commission committee, etc? If you have a recreation board or commission, explain how the board operates, what authority it has and how members are appointed. How often do they meet? Applicants without any facilities should discuss how they propose to organize their delivery system.
- VI.1 Discuss the recreation programs that are provided by the jurisdiction. Include numbers of participants for those activities proposed in the application, season lengths, and the average number of hours each day facilities (ballfields, swimming pool, etc.) are actually used (not just available) during their season.
- VI.2 Discuss recreation program staffing. How many employees are working full-time in the recreation program? How many are considered professional by training and/or experience (attach resumes)? How many part time employees? Who is or will be responsible for creating and managing park programs?
- VI.3 Discuss how park facilities are/will be maintained. What resources are available and who will be responsible for park maintenance? Explain how the facilities proposed in the application will be

maintained. What are the estimated annual operating and maintenance costs associated with the proposed facilities? What factors may facilitate or obstruct facility maintenance? What maintenance problems have been encountered?

- VII. **HANDICAP EMPHASIS:** Discuss how the proposed project will extend recreation benefits to physically and/or mentally impaired participants. What steps will be taken to provide handicap access to recreation facilities within the PSA? Examples of park facilities, which could be constructed or easily made accessible, include playgrounds, exercise trails, or interpretive areas.
- VII.1 Discuss therapeutic recreation programs, if any, that are provided by the applicant.
- VII.2 Include a statement of qualifications for key therapeutic staff members.
- VIII. **SITE ANALYSIS:** Describe the recreation site(s) to be acquired and/or developed with LWCF assistance. The description should include its size to nearest tenth of an acre, topography, ground cover and existing use. Include a detailed description of existing site improvements. Include a topo map along with the site plan.
- VIII.1 Discuss land use of the area surrounding and within the vicinity of the project site. Identify and discuss any potentially harmful or distracting uses, e.g., factory, landfill, sewage lagoon, etc. Include zoning information if available.
- VIII.2 Describe the location of the site in relation to the population center of the service area. Is the site accessible by foot or bicycle? Who will be the primary beneficiaries of the project?
- VIII.3 Discuss the environmental impact of the proposed development on the site. Be specific and avoid generalities. The assessment should include, as necessary, discussion of noise, traffic, topography, endangered species, hydrology, historical features, geology and soils, air and water quality, vegetation, transportation, and mineral resources. (If the proposed development will occur within an existing recreation area and will not introduce high intensity lighting or active recreation in a passive setting, an environmental certification may be requested.)
- VIII.4 Briefly identify and discuss plans for future improvements to the project site. Be specific in terms of activities to be developed. Include both indoor and outdoor facilities in this discussion.
- VIII.5 Project development schedule and contact list. Estimate target dates for completion of each major project element. Include the names, phone numbers, and responsibilities of the people involved in the project.
- IX. **PROJECT BUDGET:** The project budget should list all major work elements to be undertaken and their total estimated cost. If land acquisition is to be included in the proposed project, the estimated value of the property must be included as an item in the cost estimate. List quantities and units along with estimated cost, e.g., (1) picnic shelter 16' x 20'--\$10,000. The project should be divided into the following four main categories:

	LINE ITEM	LWCF SHARE	CASH MATCH	INKIND MATCH
1.	Acquisition			
2.	Development			
3.	Engineering			
4.	Administration			

In the past, some applications have been over-estimated and, therefore, unrealistic. Facility and site improvement costs must be estimated for each project element by the project architect/engineer based on knowledge of the particular project site and local/regional facility construction costs. **Clearly mark those items in the budget that will be provided by in-kind and/or donated labor and equipment.** Site preparation costs in excess of 20% of your total project cost will **not** be eligible. Architectural/Engineering and Administration fees are capped at ten (10) percent of the total project cost.

Permanent LWCF signs are required for all LWCF assisted park sites. Temporary construction signs are also required for projects funded under this program if the total project cost is \$500,000.00

Please note that compliance with state and federal handicapped accessibility regulations is required and may have a substantial impact on your project design and, therefore, cost. A synopsis of various Federal and State laws concerning architectural accessibility is included below.

In 1965, the Alabama Legislature passed a law which established the state's barrier free design standards and required that all publicly owned buildings be accessible to the handicapped. In 1968, the U.S. Congress passed the Architectural Barriers Act [Public Law 90-480] requiring all buildings purchased and leased since 1968 with the use of federal funds, wholly or in part, to be made accessible to the handicapped. In 1973, Congress enacted the Rehabilitation Act (P.L.93-112). Section 504 of that Act provides that:

"No otherwise qualified handicapped individual in the United States...shall, solely by reason of this handicap, be excluded from the participation in, be denied benefits of, or be subjected to discrimination under any program or activity receiving federal financial assistance."

These pieces of legislation establish a legal foundation in federal and state law for equal opportunity in movement, and access for physically handicapped citizens. More specifically, Section 504 of the Rehabilitation Act authorizes the creation of an Architectural and Transportation Barriers Compliance Board and provides for a complaint procedure whereby any person denied access to a public building or facility or access to programs and services may file a formal complaint. The "Procedure for Compliance Hearings" is contained in Title 36 CFR 1150, as published in the Federal Register Volume 45 - No. 229 p. 78,472.

Several publications are available to assist project sponsors to comply with state and federal laws on handicapped accessibility. For the most current accessibility information, please go to www.access-board.gov.

American National Standard Specifications for Making Buildings and Facilities Accessible to, and Usable By, the Physically Handicapped, American National Standards Institute, Inc. (ANSI), 1430 Broadway, New York, New York 10018.

- X. MAPS: Four different types of maps are required: the site map/plan, property boundary map, a Topographic (topo) map and a location map.
- X.1 SITE PLANS: The site plan should give a general layout of the park or area to be developed and include the following:
 - proposed facilities and development included in the phase for which LWCF assistance is being requested;
 - existing facilities;
 - facilities developed under previous LWCF grants, designated by project number;
 - future development plans
 - location of any existing power lines or other utilities within the site boundary area;
 - the location and measurements of any easements or rights-of-way;

- the location of floodplain if applicable;
- the site acreage to nearest tenth of an acre;
- the title block information including the title of the project, north arrow, scale, and date prepared.

The first four items should be color coded to distinguish between the different stages of development, using a separate color for each stage. Due to a lack of storage space, we request that the site plans be no larger than 24" x 36." However, smaller maps are preferable, so long as they are clear and legible; e.g. 8 1/2" x 14" site plans.

A sample site plan is included below. The plan is included to clarify points previously discussed such as:

- location of utilities
- facilities for which funds are requested
- future facilities
- clearly labeled roads
- scale and north arrow
- name of park and sponsor.

Upon project completion, an as-built-site plan/property boundary area map will be required for all development projects. The applicant should inform the consultant/engineer of this requirement prior to entering into a contract for design/engineering services.

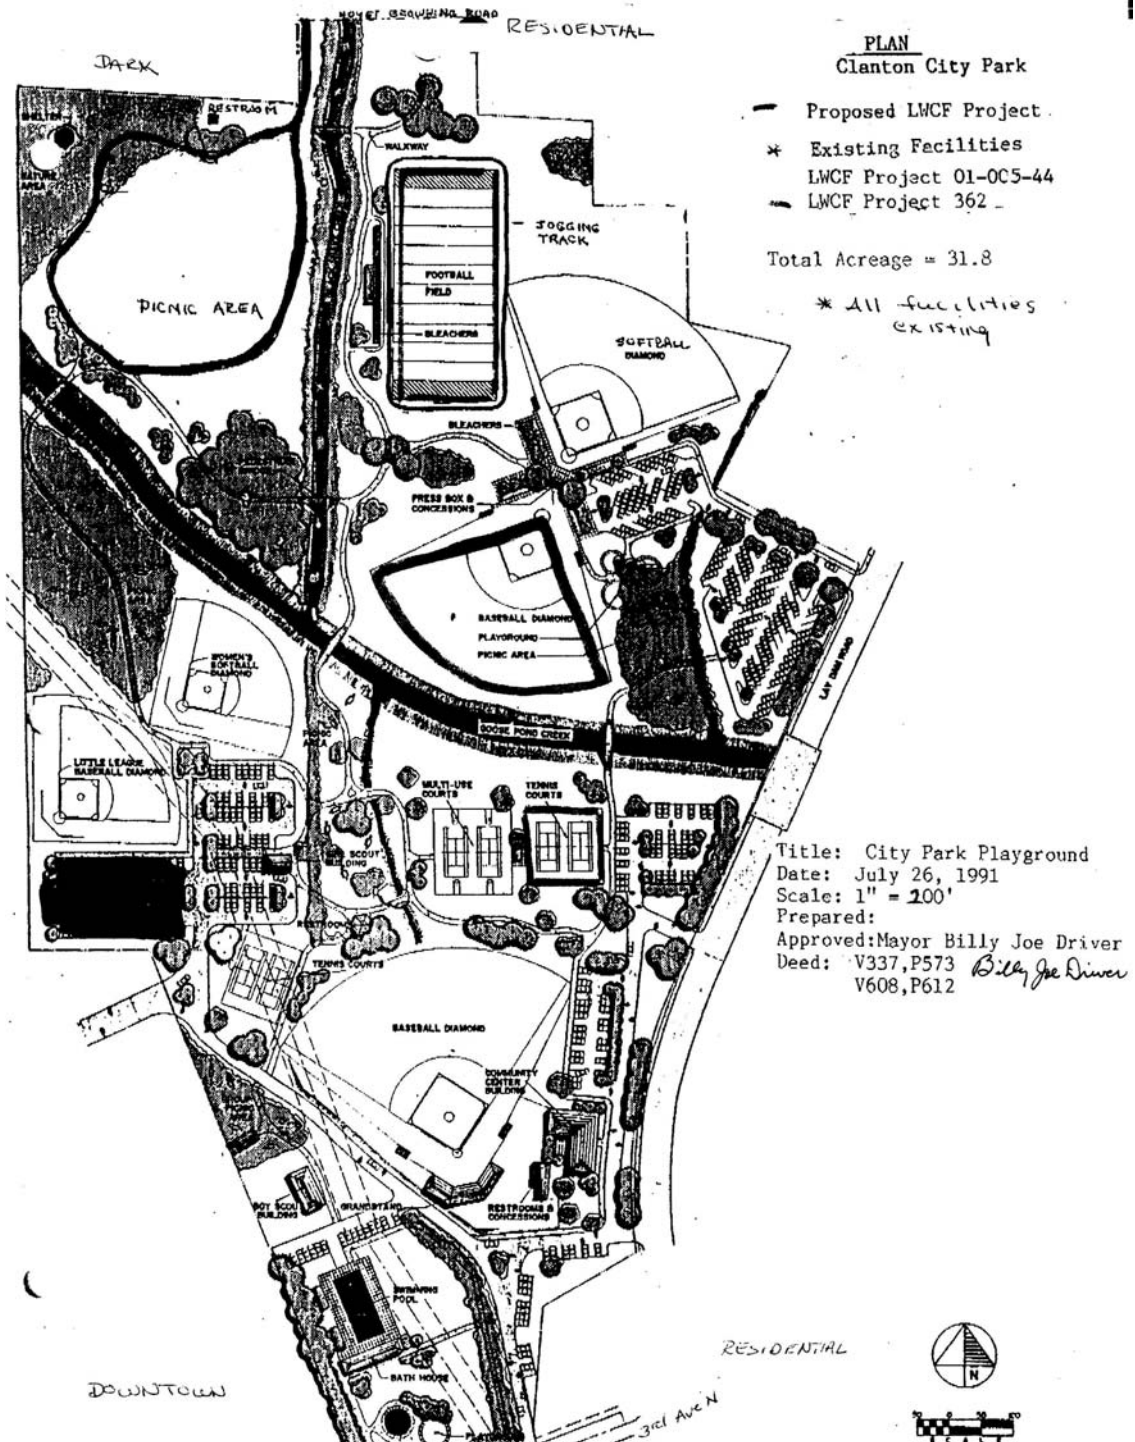

X.2 **PROPERTY BOUNDARY MAP:** An application must include a boundary map, which delineates the legal boundaries of the property being developed with LWCF assistance. A boundary map must contain the following information:

- Project title.
- Date of map preparation.
- Signature of person that prepared the map and the signature of the mayor or chairman certifying the Section 6(f)(3) boundary.
- Known outstanding rights and interests that are held by others such as known easements, deed/lease restrictions, reversionary interest, i.e., utility lines that cross the site, rights-of- way, etc.
- Deed reference--book and page number.
- Sufficient detail so as to legally identify the land:
 - a. adjoining water bodies of other natural landmarks
 - b. bearings and distances
 - c. identification of adjacent streets, roads, and highways
 - d. north arrow
 - e. a scale stated in feet per inch
- Project sponsor name

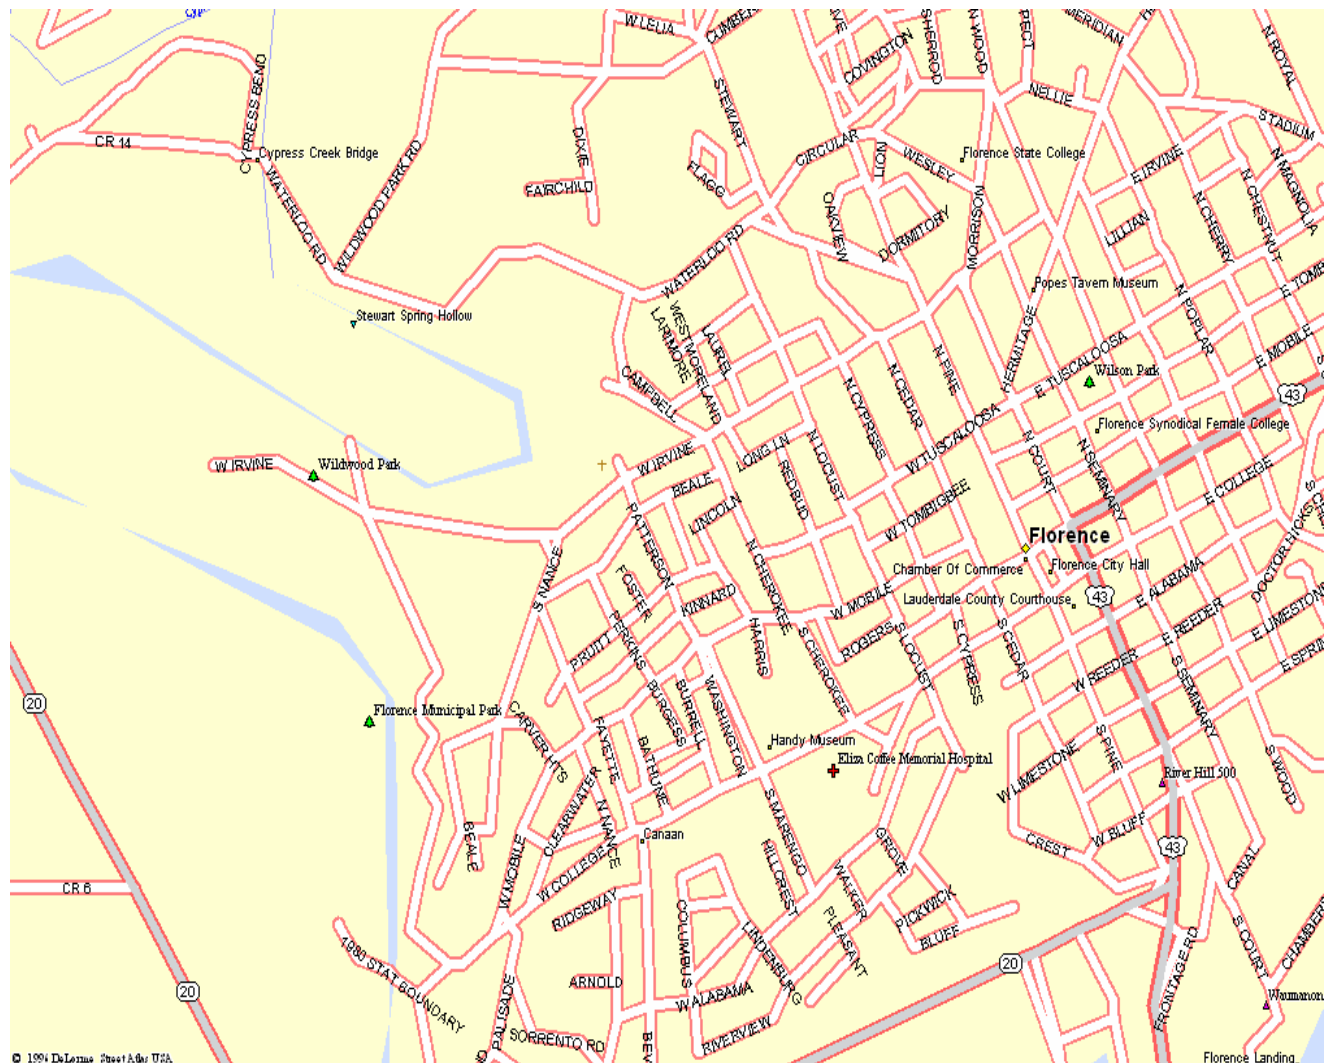

Following this section is an example of the required format for a property boundary area map. Photostatic copies, which alter the scale, are not acceptable.

X.3 **PROJECT LOCATION MAP:** The project location map must display the location of the project in relation to the city or county area and the surrounding highway/road network. This map must be sufficiently detailed so that State or Federal officials who visit the site can do so without local assistance. If the project is within a municipality, a detailed city map showing the highway network in relation to the project site will be sufficient. An example of an acceptable project location map appears on the following page. NOTE: Make sure the maps are clear and concise.

APPENDIX A

(SAMPLE) RESOLUTION

WHEREAS, the **(APPLICANT)** proposes to (acquire/construct or have constructed) recreational resources at (park name) to provide for the health and well being of the general public; and

WHEREAS, the **(APPLICANT)** intends to make application to the Alabama Department of Economic and Community Affairs for grant assistance to **acquire/develop (insert brief project scope and park name)** from the Land and Water Conservation Fund; and

WHEREAS, said programs are limited to funding a maximum of fifty percent (50%) of the proposed project costs estimated at
(\$.00) which will be used to (acquire/develop land and/or facilities) consisting of (acres and/or specific activities).

NOW THEREFORE BE IT RESOLVED, that the **(APPLICANT)** hold in reserve fifty percent (50%) of the proposed project cost for the purpose of matching the Land and Water Conservation Fund assistance, and

BE IT FURTHER RESOLVED, that in the event a grant is awarded, the **(APPLICANT)** understands that it will sign assurances to comply with all applicable Federal and State laws, rules and regulations.

(SIGNATURE)

(DATE)

ATTEST

(DATE)

APPENDIX B CITIZEN PARTICIPATION PROCEDURES

An essential component of establishing an estimate of need for a specific project is to obtain input from the local public. To be effective, citizen input must be: representative (include diverse elements of the population), significant (the input should actually have an impact on what is proposed), and widespread (include a representative sample number of citizens).

It is best if citizens are involved in actually setting priorities for project alternatives rather than reacting to a completed plan. However, if public meetings have not been held for the purpose of establishing recreational priorities, the public must, at a minimum, be involved in evaluating proposed acquisition or development alternatives.

The following guidelines have been formulated to provide direction in holding open meetings:

- A. The public meeting should be advertised at least one week in advance in the local newspaper and/or posted in public places frequented by citizens residing in the service area. An example of an advertisement is attached for your use. Advertisements must **not** appear in the legal section of the newspaper.
- B. The proceedings of project related public meetings must be recorded in an official record maintained by the applicant. The minutes should be kept in the applicant's files along with the application package to provide documentation of meetings. A summary of the meeting, including the number of persons attending, alternatives discussed levels of opposition to the proposed plan and the source of opposition must be included in the project narrative.
- C. A record of the citizens who attended meetings should be kept. This record should include the name, address or organization of each person present.
- D. A concurrence form should be distributed at the beginning of the meeting. Participants should be encouraged to complete the form before the end of the meeting. A sample form is attached.

The Land and Water Conservation Fund Act of 1965 (Public Law 88-578), requires that citizens be afforded the opportunity to express their views concerning the recreational needs of their community. To provide a forum for discussion, an open meeting is being held on

_____, at _____ p.m. at
[DATE]

_____,
[LOCATION]

sponsored by _____.
[APPLICANT]

The purpose of this meeting is to discuss the (**acquisition and/or development**) of recreational facilities at [INSERT PARK NAME AND LOCATION].

Anyone wishing to support or oppose the proposed park acquisition/improvements is invited to voice their opinion at this meeting or submit written comments to [INSERT ADDRESS AND CONTACT] within two weeks following the meeting.

[illegible]

APPENDIX C

LWCF PRIORITIES FOR ACQUISITION AND DEVELOPMENT

The acquisition and development priorities for fiscal year 2003 are listed below.

DEVELOPMENT PRIORITIES

1. Passive and non-tournament field and court facilities in support of unstructured outdoor recreation use.
2. Development designed to provide or increase handicap access to recreation facilities and areas.
3. Renovation of existing facilities (Especially those damaged by natural disaster).
4. Development of recreational activities in areas where the existing supply is inadequate in terms of quantity or quality.
5. Development of environmental education facilities.

ACQUISITION PRIORITIES

1. Acquisition of urban open space.
2. Acquisition of wetlands identified in the State Wetlands Plan.
3. Acquisition of sites listed on the National Register of Natural Landmarks.
4. Acquisition deemed necessary to protect or preserve a significant natural resource threatened with damage or loss..

APPENDIX D

1995 RECREATION ACTIVITY PARTICIPATION RATES

LAND AND WATER CONSERVATION FUND GRANT PROGRAM

Estimated percentages of the resident population participating in, and estimated numbers of activity occasions for, selected outdoor recreation activities in the Northwest Alabama Council of Local Governments Planning District, 1989.

Activity	Percent of Residents Participating	Activity Occassions per Capita of the Population
Walking for pleasure	30.1	50.6
Pool swimming	20.2	11.3
Freshwater fishing (bank)	18.0	6.6
Freshwater fishing (boat)	16.3	5.7
Bicycling	10.7	10.0
Gardening	10.6	11.5
Baseball/Softball	9.9	4.8
Freshwater beach	9.4	2.9
Deer and turkey hunting	8.8	2.7
Saltwater beach	7.5	11.9
Outdoor basketball	6.9	2.4
Freshwater power boating	5.8	11.1
Trail hiking	5.6	8.0
Camping developed sites	5.2	0.7
Camping primitive sites	4.4	0.5
Golf (9 hole rounds)	4.2	2.0
Horseback riding	4.0	4.5
Volleyball	3.7	1.1
Football	3.7	0.9
Small game hunting	3.4	1.2
Swimming in freshwater	3.4	2.3
Jogging	2.7	3.4
Saltwater fishing (boat)	2.6	0.7
Tennis	2.5	1.6
Water skiing	2.4	1.0
Driving for pleasure	2.3	0.8
Visiting historical sites	2.3	0.3
Canoeing/rafting	1.6	1.0
Riding off-road vehicles	1.4	1.1
Soccer	1.2	0.4
No outdoor recreaiton	11.3	***

Source: Projected from telephone survey data collected by the Center for Business and Economic Services, Sorrell College of Businees, Troy State University, Troy, Alabama, during the first quarter of 1990.

Estimated percentages of the resident population participating in, and estimated numbers of activity occasions for, selected outdoor recreation activities in the West Alabama Planning and Development District, 1989.

Activity	Percent of Residents Participating	Activity Occassions per Capita of the Population
Walking for pleasure	32.5	38.8
Pool swimming	25.1	13.4
Freshwater fishing (boat)	16.3	4.7
Baseball/Softball	15.8	6.8
Freshwater fishing (bank)	14.2	4.0
Gardening	12.2	7.4
Outdoor basketball	11.7	10.0
Bicycling	11.4	9.7
Deer and turkey hunting	9.5	2.7
Camping developed sites	8.0	1.5
Saltwater beach	7.2	0.4

Appendix E

Local Demand Calculation

Due to concentrations of recreation facilities in large urban areas, many areas of the state may not have access to such facilities while the regional analysis indicates that the existing supply meets or exceeds demand. To compensate for this situation, cities/counties may calculate their own demand ratios by using the following formula. Determination of the service area is the key to successful application of this formula. Recreation activities have different service areas as do cities and counties. For example, a playground may only serve a neighborhood within a city while a golf course may address the demand for golf within the entire county. Care must be taken in defining the service area as it may affect project scope and, therefore, cost.

1. Determine Service Area Population (SAP)-
2. Identify Potential Demand--Multiply the SAP by the appropriate Per Capita Participation Rate). Demand must be calculated separately for each activity, i.e., baseball field, tennis court, etc.
3. Compute Existing Supply--Multiply the number of existing like activities within the service area by the Carrying Capacity for that activity (Carrying Capacities on Page 61).
4. Compute Proposed Supply--Multiply the number of like proposed activities by the appropriate carrying capacity and add the amount to the existing supply computed in 3 above.
5. Divide the proposed supply by the potential demand to arrive at the percent of population served. Each activity ratio (softball, tennis, etc.) must be calculated and analyzed separately. Any activity ratio that is greater than 130% of demand is not eligible for LWCF assistance and should be deleted from the project scope.

The following example will serve to clarify this procedure:

FORMULA:
$$\frac{\frac{Ca(ae+ap)}{P \times Ra} + \frac{Cb(be+bp)}{P \times Rb} + \dots \frac{Cn(ne+np)}{P \times Rn}}{N}$$

Where:

Ca = Carrying Capacity
 e = Activities Existing
 p = Activities Proposed
 P = Service Area Population
 R = Per Capita Participation Rate
 a = Activity "a"
 b = Activity "b"
 n = Activity "n"
 N = number of Separate Activities

2005 SCORP-Annual Carrying Capacity Per Unit For Selected Recreation Activities

* These figures were computed as :

Carrying Capacity=Unit Capacity X Turnover Rate X Season Length

	Activity	Capacity	Unit	Turnover Rate Per Day	Season Length (Days)	Carrying Capacity Per Unit Per Year
1	Saltwater Beach Activities	218	acre	2	180	78,480
2	Freshwater Beach Activities	218	acre	2	110	47,960
3	Boating	1	acre	2	150	300
